

WE ARE HIRING

Errai Pasifik is a software development company that started by a group of Indonesian developers who have come back from working in California, United States, with the goal of bringing the Silicon Valley energy, creativity and work culture to Indonesia.

Our client is a company we know very well, having worked for them in the US. It is an exciting multinational company with offices in the US, Europe and Hong Kong. This client has developed innovative technologies to make audio and web conferencing a lot simpler and more productive. If you join us, you will be working closely with their San Fransisco-based software development team to build various software applications that people around the world use to get connected and get more things done.

Web Developer

You'll be working on our end-user self-provisioning site, our corporate site and various mini-sites as needed. You'll be working with the latest technology in Web Development like HTML 5, CSS and AJAX.

For this role, you will need to have:

1. Programming skills using Microsoft .NET technologies, C# .NET and ASP.NET
2. Knowledge of HTML 5, CSS, and JavaScript
3. Relevant degree (Sarjana Strata 1- Bachelor) or equivalent work experience
4. Ability to communicate in English, both verbally and written

C++ Developer

You'll be working with our core server, building a multithreaded server farm that has to handle thousands of connected clients from web, mobile devices and PCs. You'll be working to keep our load balanced among our servers in the farm, while keeping important information in sync.

For this role, you will need to have:

1. Programming skills using Microsoft .NET technologies, especially C++ .NET
2. C# ability is a big plus
3. Good understanding of TCP/IP
4. Knowledge of multi-threaded servers
5. Windows NT IO experience
6. Relevant degree (Sarjana Strata 1- Bachelor) or equivalent work experience
7. Ability to communicate in English, both verbally and written

QA Automation Engineer

You'll be working to create daily builds from engineer's code, deploy them on our test lab, and perform first-level QA. You'll be responsible to manage and develop new automatic test suites to automate most of our testing. You'll be performing load test, write performance report and write up detail analysis of bugs and their solution to our client.

For this role, you will need to have:

1. Good Knowledge and experience in using automated test tools
2. Able to write custom-made automatic test tool using C#
3. Scripting skill using VB, Javascript, PowerShell etc
4. Good analytical skill and detail oriented personality
5. Good communication skills in English, both written and verbally
6. Relevant degree (Sarjana Strata 1- Bachelor) or equivalent work experience

DevOps Engineer

You'll be working closely with our client's San Francisco Operation Team to diagnose issues on Production, analyzing logs and check against our source-code to find the root cause and propose solution and communicate that solution to our engineers. You'll be managing our test lab and assist our QA engineers to mimic production environment as much as possible.

For this role, you will need to have:

1. Programming skills using Microsoft .NET technologies, C# .NET, ASP.NET and SQL Sever
2. Scripting skill using VB, Javascript, PowerShell etc
3. Good analytical skill and detail-oriented personality
4. Good communication skills in English, both written and verbally
5. Relevant degree (Sarjana Strata 1- Bachelor) or equivalent work experience

All job roles require candidates who are able to work full-time in Jakarta. We offer nice benefits including, but not limited to, a competitive salary and medical insurance. **Please send your application to s.2013@erraiPasifik.com** [job](#)
